The ProBusS Summertime Planner

Are you ready for summer? Got the trip planned? Golf league going? Grill ready?

May we suggest you can enjoy an even better summer by doing a few key things before you head out of town or out to the course? At the same time, you can save enough money for a round of golf or a nice dinner.

This is the ProBusS Summertime Planner, with 6 ways to ensure your summer is more fun, and your plant is more productive.

Plus, we're including our very own **ProBusS stimulus package**, giving you an opportunity to **save \$100** on your next ProBusS project.

See the details below!

Easy vacation scheduling

Vacation scheduling can be tough, right? Everyone wants the first week in July off, the first two weeks in August, and the long weekend over Labor Day.

But you can't give everyone the same prime time off: who's going to work if everyone's gone?

ProBusS skilled trade professionals and maintenance staff, that's who.

Electricians, plumbers, and pipefitters. Machine repair and rebuilding professionals. Plus maintenance technicians for all sorts of jobs you need done in the plant.

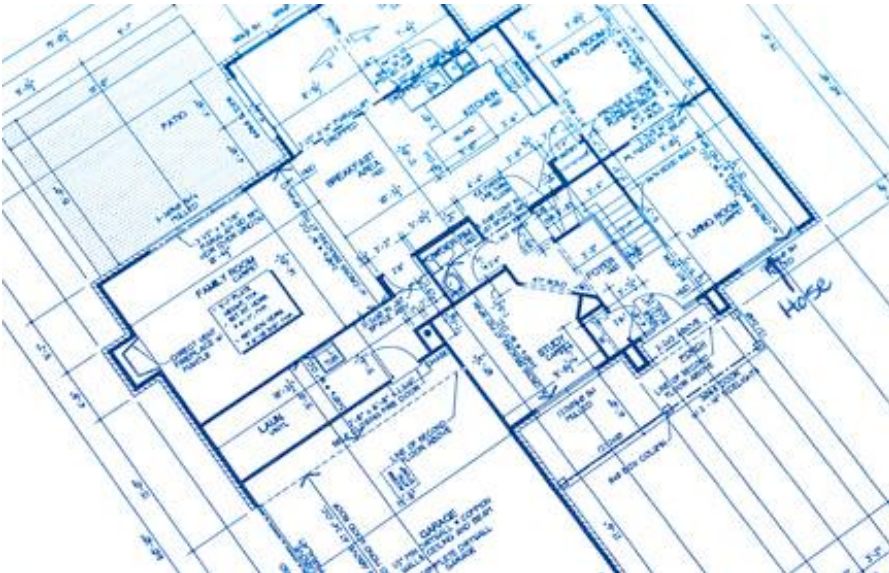

Available to cover a week's vacation or a six-month absence.

ProBusS workers are available on-site, on demand. Call us to schedule summer crews now.

Make a summer move

Summer is great time to relocate a machine to a more efficient location in the plant. To change out a line, or to reorganize part of the plant to free up additional space.

At ProBusS, we've managed the move of an entire manufacturing plant. We handled the moves of many individual machines, too. We've even cleaned out manufacturing plants down to the bare walls, removing all electrical, air, water, and conveyor lines. So if you're planning anything from moving a plant to just rearranging your parts racking, we can make it happen.

Time to build?

Summer is also a perfect time to have equipment and individual components fabricated and installed. We recently made a welding

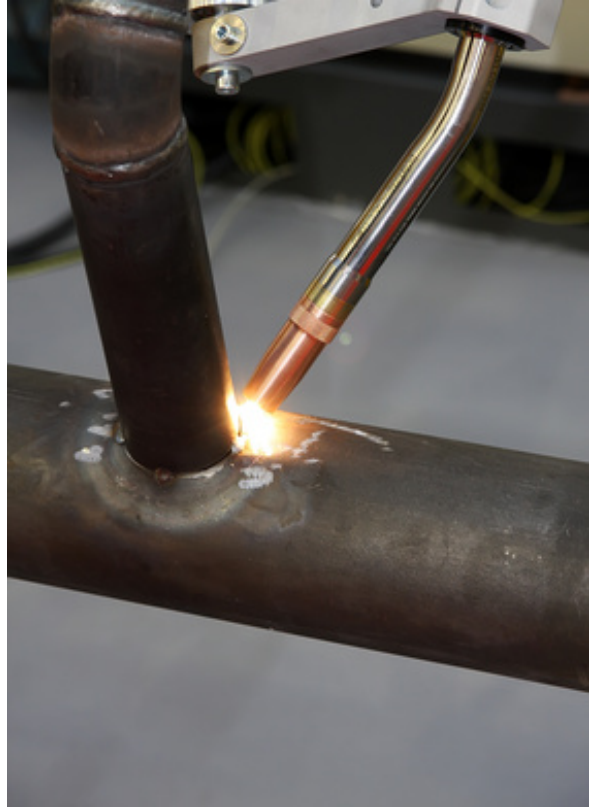

curtain for one of our clients. It's a specially designed curtain to protect workers from the harmful UV light of arc welding and reduce the risk of flash burns. Plus, the curtain protects the company from OSHA fines. Since the line was down at the time, it was a good time to fabricate and install the curtain, with no loss of production.

If you need a custom designed welding curtain system, or any other special parts or equipment, call us. In the ProBusS shop, our skilled tradesmen have made all kinds of tools, parts and equipment for our clients:

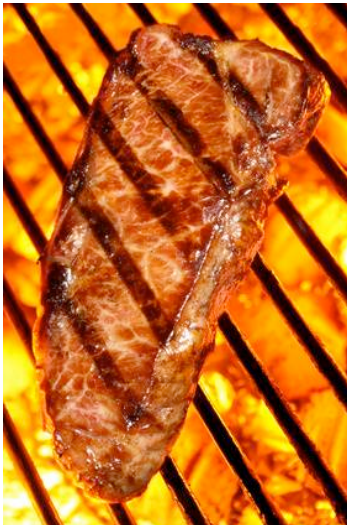

- machine parts
- safety equipment
- storage lockers
- shelving
- dollies
- rack system replacement components
- and a whole lot more

What can we make for you?

Insuring your summer fun

Burned steak is what we're trying to prevent here. Along with other problems that preventative maintenance can help you avoid.

Here's reason #57 why PM should be in your summer plans: PM can prevent those evening and weekend phone calls just when you're ready to take the steak off the grill. A machine or component has broken down again, and the guys at the plant need some help. The call takes just long enough to turn those beautiful cuts of beef into charcoal briquettes.

No amount of Heinz 57 will fix a burned sirloin, and no amount of after-the-fact repair will prevent breakdowns or save you money and headaches like PM. So make a preemptive phone call to ProBusS to plan a summer PM plant tune up. We've helped many plants realize the savings, efficiencies, and reduction in down time, that PM offers. The staff can take vacation, ProBusS will make sure your equipment is in tip top shape, and you can go back to bar-b-q nirvana.

Fix it, move it, improve it

Have a press that needs repair? Or maybe a fork lift that's waiting for a custom fabricated part? How about a production line that could use some tables (or racks, or cooling, or other improvement)?

When vacations make the staff a little leaner, it's a good time to call ProBusS to make those repairs and line changes you've been putting off. We're ready to tackle the smallest repair or the largest machine overhaul. Plus, a professional project manager is assigned to every job, large or small, at no extra charge.

Stimulus Package: Summer's Ultimate ProBusS Economic Recovery plan

Everyone's talking about the economic stimulus package so we figure it's only right that ProBusS offer one to you. Here's the **S**ummer's **U**ltimate **P**roBusS **E**conomic **R**ecovery plan, also known as the **SUPER** plan:

Schedule a ProBusS project before July 4th, for completion before Labor Day, with a value of at least \$1,000 and we'll give you a SUPER discount of \$100 off the bill.

The project can be a repair, a machinery move, preventative maintenance, fabrication of parts or equipment, or skilled trades or maintenance staffing. A short-term project or a long-term contract, an order for one custom paint rack or a thousand dollies. Just place your minimum \$1,000 order before the 4th of July for completion before Labor Day (new projects only, please), and we'll take \$100 right off the top. It's our way of saying thank you for your business, and wishing you happy summer!
