

# ProBusS

VOLUME 2

PRESENTS

**ProBusS Presents - a quick look at news about skilled trades, maintenance, and manufacturing.**

## A Complete Fabrication

ProBusS clients often need things fabricated. Since we have a full metal shop, experienced, on-staff skilled tradesmen, and we like to make a lot of noise, ProBusS often has more things under construction around West Michigan than anyone, with the possible exception of the Department of Transportation.

## We've Been Busy

At ProBusS, we get it right. That's why companies large and small hire us for fabrication work. Some of our recent projects include:

- 1,200 platform dollies
- Custom machine parts
- Guard rail - new and resized railing systems
- Custom storage cage
- A custom rack for holding CNC machine patterns
- Repair of parts storage racks, hydraulic lifts, and other equipment

*(left to right)*

Millwright Rick Ferguson checks a guard rail section that's been cut down and welded for re-use, and is now ready for painting.

A crate of casters, part of the materials list for 1,200 platform dollies.

A storage rack for CNC machine patterns.

## Your Place or Ours

For many fabrication jobs, we can work at your site or ours, though many clients like to move the noise and activity off-site, which we're happy to do. Metals, plastics, wood, Plexiglas, whatever: we can cut it, fasten it, mill it, grind it, assemble it, paint it.

We can move it, too. **ProBusS has:**

- trucks and trailers
- forklifts
- scissor lifts
- rigging equipment

## Special Orders No Problem

Custom projects are a ProBusS specialty. Need a special replacement part? Want to modify one of your machines, or all of them? Would you like to save materials and cost by re-using some equipment instead of buying new? We're ready when you are.

Repairing a hydraulic lift.

A ProBusS-designed steel and expanded metal cabinet keeps files secure.

Milling a custom part in the ProBusS shop.

## Project Management? Check.

With any fabrication, repair, rebuild, move, and in fact with any project, ProBusS provides professional project management at no extra charge. Every step of the way, you have less to manage and worry about. We deliver a quality product, on budget, on time.

And that is no fabrication.
