Time to reorganize, retrofit, or repair?

It's a tough economy. Saving old equipment, rebuilding rather than purchasing new, and retrofitting lines are cost-effective measures that make more sense than ever. ProBusS has the know-how and experience to help you repair, rebuild, and reconfigure existing machines and lines.

We've handled fast, emergency repairs and managed the move of an entire manufacturing plants, and everything in between. It's a good time to make some changes:

- Need parts fabricated for one of your lines?

- Want to reconfigure a rack system?
- Want to take advantage of some slack time, or a holiday shutdown to retrofit a machine?

ProBusS works **off-shifts**, **weekends**, whatever it takes to get your job accomplished.

If you're wondering if we can handle a specific production, manufacturing, or maintenance project... we probably can. And if we don't have the resources in-house, we will find the right resources for your project.

Call us to schedule projects during production down time, holidays, any time that works for you.

Skilled Tradesmen vs. Temps

"Hello, is that the temp agency? Now listen,
I specifically asked for *Elves!*"

We're **not** a temp agency. Our skilled trades professionals are ProBusS employees, so we can provide you with experienced professionals for any job, whether it's for a day, a week, or a long term project.

At ProBusS, we care about the work we do and the companies we serve, and we can help you reduce your labor costs and improve productivity. You have access to top flight skilled tradesmen only when you need them. No ongoing overhead or salaries, just experienced professionals who are ready when you have a job to do. Plus, professional project management provided by ProBusS at no extra charge on every project. The employees of ProBusS are ready to help:

- electricians
- machine repairmen
- millrights
- pipefitters
- maintenance technicians

Forget temps. Work with the professionals at ProBusS.

A valuable partner

When you bring ProBusS on the job, you've gained a valuable partner. A project manager will guide the work every step of the way. Skilled tradesmen will do the work carefully, completely, and correctly.

ProBusS carefully monitors every step of your project. For example, our preventative maintenance programs are tracked continually. You receive regular updates on maintenance performed, all repairs needed or completed, and any parts of the system that need attention. We can determine the optimum replacement time, and help you avoid more expensive corrective replacement costs and downtime. Overall, your PM program is simpler to operate, saves more money, and proves more effective than a "reactive maintenance" program. We have several clients enjoying the benefits of a ProBusS PM program.

With experience across industries -furniture, plastics, food, paper, footwear, tool & die, and more- ProBusS offers you experience, dedication, and a record of performance unmatched in the business.
